

DIANNE MARSHALL

SLIM ULTRA HALO

YOUR CARE & FITTING GUIDE

AS WITH ALL PREMIUM HUMAN HAIR EXTENSIONS, AVOIDING EXCESSIVE HEAT AND ONLY USING PROFESSIONAL-QUALITY HAIRCARE PRODUCTS WILL HELP MAXIMISE THE LIFESPAN OF YOUR HALO.

FOR FULL MAINTENANCE ADVICE, PLEASE REFER TO YOUR DIANNE MARSHALL HAIR EXTENSION CARE GUIDE FOR ADDITIONAL CARE TIPS AND RECOMMENDATIONS.

HOW TO FIT YOUR HALO

STEP 1

Create a circular section around your head:

- Approximately 2 inches back from your front hairline
- Around 1 inch above each ear
- Finishing at the occipital bone at the back of your head.

Secure the top section of your hair with a clip or hair tie.

STEP 2

Adjust the Halo wire to fit your head.

Hold the metal connector and gently pull one of the double wires to make the Halo larger, or pull the opposite double wire to make it smaller.

STEP 3

Place the Halo onto your head so the wire sits comfortably within the section you've created.

Check the fit and readjust the wire if necessary until it feels secure and snug without causing pressure.

STEP 4

Release your natural hair and use a tail comb or fingers to gently pull your own hair over the Halo wire, blending it seamlessly with the extension.

For the most natural finish, your Halo may require shaping or trimming by a professional hairdresser to blend perfectly with your own hair.

REMOVING YOUR HALO

To remove your Halo, hold the wire at the front hairline and gently slide it backwards over your head until it releases.

CARING FOR YOUR HALO

Unlike permanently fitted extensions, your Halo does not require frequent washing.

We recommend:

- Daily wear: Wash approximately once a week.
- Occasional/weekend wear: Wash every 2-4 weeks.
- A sulphate-free, protein-free shampoo & hair masque
- A heat protection spray before both blow-drying and heat styling
